## AMENDMENTS TO THE CLAIMS

## Claims 1-14: Cancelled

- 15. (Original) A plasma lighting bulb, comprising:
- a bulb emitting light, being formed of a transparent material, and having a plurality of hexagonal patterns formed on an outer surface of the bulb due to an alignment of a plurality of grooves having a predetermined depth; and
  - a metal wire blocking electromagnetic waves formed in the grooves forming the patterns.
- (Original) The lighting bulb according to claim 15, wherein the transparent material includes one of glass and plastic.
- 17. (Original) The lighting bulb according to claim 15, wherein a cross-section of the grooves forming the hexagonal patterns is formed of one of a semicircular shape, a V-shape, and a polygonal shape.
- (Original) The lighting bulb according to claim 15, wherein the metal wire is formed of one of copper (Cu), aluminum (Al), and silver (Ag)-coated copper (Cu).
  - 19. (New) A plasma lighting bulb comprising:
- a bulb having grooves of a predetermined depth on at least an inner or an outer surface of the bulb, wherein the grooves form a plurality of patterns comprising at least one of circular shapes and polygons; and

metal formed in the grooves for blocking electromagnetic waves.

 (New) The plasma lighting bulb of claim 19, wherein the bulb is formed of a transparent material.

- (New) The plasma lighting bulb of claims 20, wherein the transparent material is glass.
- 22 (New) The plasma lighting bulb of claim 20, wherein the transparent material is plastic.
- (New) The plasma lighting bulb of claim 19, wherein the cross-section of the groves is a semi-circular shape, a V-shape, or a polygonal shape.
- (New) The plasma lighting bulb of claim 19, wherein the metal in the groves is formed of wire.
- $25. \hspace{0.5cm} \hbox{(New) The plasma lighting bulb of claim 19, wherein the metal is filled within the grooves.}$
- (New) The plasma lighting bulb of claim 19, wherein the metal includes one of copper (Cu), aluminum (Al), and silver (Ag).
- (New) The plasma lighting bulb of claim 19, wherein the polygons are one of triangles and hexagons.
